

Priyanka Nandurkar

Software Test Engineer

✉ priyankanandurkar1926@gmail.com ☎ 7709236692 📍 pune ,India

Objectives

Manual Automation Test Engineer with BE(Computers) having 4+ years of experience in Manual Testing, Automation testing(Selenium),Product and Web Service Testing(API Testing) on Ecommerce & Banking domain.

Skills

Automation Testing - Selenium WebDriver with Java and Python

Software Methodologies - Agile Methodology

Defect Management Tool - JIRA

Version Control Tool - GIT & GitHub

Test Case Management Tools - TestRail

Functional , Non-Functional , Smoke, Sanity, Regression and Re-Testing

Testing Framework - Data Driven, Hybrid, TestNG, BDD

Web Services Testing Tools - Postman SoapUI

Project Management Software - Maven

Databases - Oracle 10g

Performance Testing Tool - Apache J-Meter

Languages - JAVA , SQL

Professional Summary

- Expertise in testing Web based applications using **Selenium WebDriver with Java**.
- Expertise in testing Product based application using **Selenium WebDriver with Python**.
- Strong experience and knowledge of **Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC)**.
- Expertise in various types of Testing like **Functional, Regression, Re-Testing, GUI, Cross Browser, Database, Sanity, Performance Testing**.
- Developing Test Cases (Test Scripts) using Element locators, WebDriver methods.
- Good Knowledge in **Agile with Scrum**. And experience in analyzing the User stories in Sprint Backlog. Actively Participate in all Agile Ceremonies to discuss about Project Progress report every day.
- Excellent understanding of Defect life cycle.
- Design the **Traceability Matrix** to map Business Requirements with test Case.
- Good working knowledge of Maven, GitHub, Listeners, XML & HTML Reports.
- Experience in designed Functional decomposition **TestNG** framework.
- Knowledge of handling Synchronization (Implicit , Explicit and Fluent Wait).
- Good Knowledge of (BDD) Cucumber Framework.
- Excellent knowledge of software development methodologies like **Agile, Waterfall, V-Model, Fish Model**.
- Experience in writing **X-path expression**.
- Reviewing, Rework if needed and Executing of Test Cases.
- Good knowledge of Test Case Management tools like **TestRail**.
- Good knowledge and actively contributing to **periodic** reports (daily, weekly) on testing activities.
- Extensive experience in developing SQL scripts to validate the databases tables and reports data for database testing using **DML** and **DDL** commands.

- Experience in writing SQL Queries to validate the database tables using **RDBMS / Oracle Database**.

Professional Experience

04/2023 – present	Senior Software QA Analyst OnDotMedia
01/2019 – 03/2023	Software Test Engineer <i>Zeevaa Tech Management Service private ltd</i>

Projects

Project Name : Wish

Domain : E-Commerce , **Client :** San Francisco, US

Wish may be the first online shopping website on this list you're unfamiliar with, but many recognize it as the cheapest online retailer around.

If you're looking for bargains and cheap products, then Wish is hands-down your best bet. Online shopping can be expensive, especially when you factor in shipping costs, but Wish provides a more affordable alternative so you can save money when you shop online.

Roles and Responsibilities :

- Understanding the requirement properly, and identifying all possible scenarios and creating Test Cases. Communicating with Business Analyst for better understanding of requirements.
- Performed Smoke, Functional, System Integration, Retesting, Regression Testing.
- Participating in all agile ceremonies.
- Preparing reports of test execution results and work progress on daily, weekly basis.
- Keep myself up-to-date on the overview of the development technologies
- Effective co-ordination between development team and testing team.
- Logging the defects through Jira, interacting with dev team, tracking it and preparation of defect reports.
- Provide inputs to the team in order to improve the test process.
- Validation of the response received through the SOAP UI by the help of assertions and codes.
- Interact with developers and discussed technical problems, Bugs Tracking.
